Gladstone Commercial Corporation Announces Financial Results for the Third Quarter Ended September 30, 2004: Net Income of \$0.09 Per Weighted Average Common Share and Funds From Operations of \$0.13 Per Diluted Weighted Average Common Share

MCLEAN, Va., Nov. 3 /PRNewswire-FirstCall/ -- Gladstone Commercial Corp. (Nasdaq: GOOD) (the "Company") reported today financial results for the third quarter ended September 30, 2004. Net income for the three months ended September 30, 2004 was \$685,038, or \$0.09 per basic and diluted weighted average common share, compared to a net loss for the three months ended September 30, 2003 of \$104,208, or \$0.03 per basic and diluted weighted average common share.

For the nine months ended September 30, 2004, net income was \$624,009, or \$0.08 per basic and diluted weighted average common share, compared to a net loss for the period from February 14, 2003 (inception) through September 30, 2003 of \$114,862, or \$0.08 per basic and diluted weighted average common share. Total assets were \$105,113,407 as of September 30, 2004 as compared to \$105,061,370 as of December 31, 2003.

"In the third quarter we added four additional properties to our portfolio, for an aggregate purchase price of approximately \$23.3 million. At September 30, 2004, we had approximately \$62.5 million invested from our initial public offering in eight real properties and one mortgage loan. Subsequent to September 30, 2004, we acquired four properties for an aggregate cost of \$12.8 million. The third quarter showed positive growth and results for us. We look forward to closing out our first full fiscal year ending December 31, 2004 with a strong portfolio, good backlog and a consistent dividend," said a spokesperson for the Company.

The National Association of Real Estate Investment Trusts (NAREIT) developed Funds from Operations, ("FFO"), as a relative non-GAAP (Generally Accepted Accounting Principles) financial measure of performance and liquidity of an equity REIT in order to recognize that income-producing real estate historically has not depreciated on the basis determined under GAAP. FFO, as defined by NAREIT, is net income (loss) (computed in accordance with GAAP), excluding gains (or losses) from sales of property, plus depreciation and amortization of real estate assets, and after adjustments for unconsolidated partnerships and joint ventures.

For the three months ended September 30, 2004, FFO was \$998,070, or \$0.13 per diluted weighted average common share. For the nine months ended September 30, 2004, FFO was \$1,143,142, or \$0.15 per diluted weighted average common share.

A reconciliation of net income to FFO is set forth below:
